

7,62 mm AKM / AKMS ASSAULT RIFLES

Caliber: 7,62 x 39 mm

Variants: Fixed stock, folding stock

Finishing: Polymer, Wooden, Tactical

DESCRIPTION

Design

The AKM ("Kalashnikov modernized automatic rifle") is a 7.62mm assault rifle designed by Mikhail Kalashnikov. It is a common modernized variant of the AK-47 rifle developed in the 1940s. Introduced into service with the Soviet Army in 1959, the AKM is the most ubiquitous variant of the entire AK series of firearms and it has found widespread use with most member states of the former Warsaw Pact and its many African and Asian allies as well as being widely exported and produced in many other countries. The production of these Soviet rifles was carried out at both the Tula Arms Plant and Izhmash. It was officially replaced in Soviet frontline service by the AK-74 in the late 1970s, but remains in use worldwide.

In set:

- 1 x magazine pouch
- 1 x cleaning kit
- 1 x oil bottle
- 1 x belt
- 4 x 30 rounds polymer magazine

Specifications:

Weight

- AKM: 3.1 kg (6.83 lb) w/unloaded magazine
- AKMS: 3.3 kg (7.3 lb) with full magazine
- 30-rnd magazine: 0.33 kg (0.73 lb)
- 6H4 bayonet: 0.32 kg (0.71 lb)

Length

- AKM, AKML: 880 mm (34.6 in)
- AKMS, AKMSN: 920 mm (36.2 in) stock extended / 655 mm (25.8 in) stock folded
- Barrel length
- 415 mm (16.3 in)

Cartridge

- 7.62x39mm M43
- Action: Gas operated, rotating bolt

Rate of fire:

- Cyclic rate of fire: 600 rds/min
- Practical rate of fire:
- Semi-auto 40 rds/min
- Full-auto 100 rds/min
- Muzzle velocity: 715 m/s (2,346 ft/s)
- Effective firing range: 350 m (383 yd)
- Feed system: 30 round detachable box magazines
- Sights: Rear sight notch on sliding tangent, front post
- 100 - 1000m sight adjustments
- Sight radius: 378 mm (14.9 in)
